Photograph & Information Guide

HAND PAINTED KITCHENS UK

A simple explanation
of how to take photographs
& send the information we need

The best way to take & send photographs

DAYLIGHT

Ideally take the photographs in daylight with lighting, for a clear and bright photograph.

COMPLETE KITCHEN

One or two overall shots, to show the scale of the kitchen.

WALL BY WALL

We need to be able to see and count each door and drawer front as well as open shelves, over mantle etc. Simply take a photograph of each wall that has furniture.
If necessary take 2 or more photographs of a long run.
Overlap if necessary, we can work it out.

ISLANDS

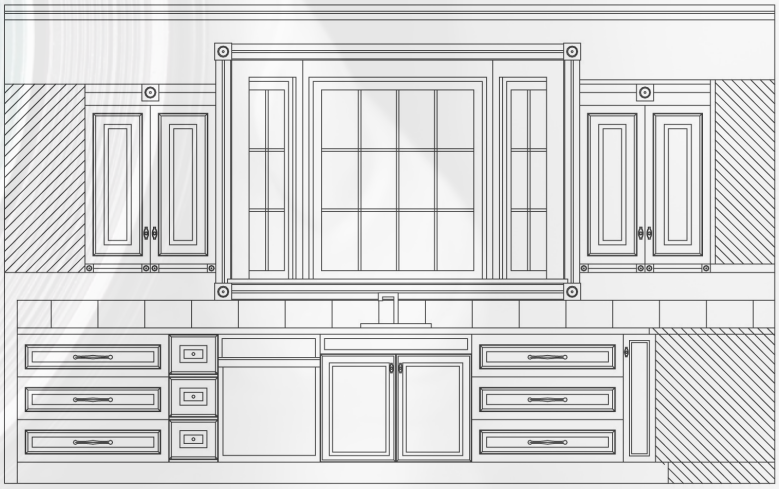

Take a photograph of each side of an island.

DAMAGED AREAS

If there are any damaged areas, please take a close up photograph.

PLANS & DRAWINGS

We can work from elevation drawings.

Send…

When you have taken the photographs, each image will have an option to email direct. Send one at a time if you are unsure.

Alternatively, add them to a folder and email the folder.

We are familiar with Whatsapp if that's easier for you.

We are familiar with Dropbox if that's easier for you.

Please send any relevant information that you feel may help us with your estimate and include the county you live in.
Also, don't worry if this all sounds a little too much as we are more than happy to do a site visit as part of the final cost.
